Professional Summary

Senior Full-Stack Developer with 20 years of experience designing and developing end-to-end software solutions. Skilled at transforming complex business challenges into robust, scalable, and efficient systems, applying the most suitable technology for each scenario.

Passionate about solving complex problems and delivering real business value. I bring an analytical, resilient, and results-driven mindset, and I enjoy mentoring and supporting other developers to achieve strong team performance. My approach blends technical expertise with a strategic understanding of product needs, backed by continuous learning and innovation.

Technical Skills

- ◆ **AI:** Design and implementation of solutions using local LLMs, RAG, and automation; leveraging Python, PyTorch, Google Vertex AI, N8N, Agents, Cursor, and Antigravity.
- ◆ **Backend:** C#.NET (ASP Core & Framework), Java, Spring Boot, Python
- ◆ **Frontend:** React, React Native, Angular, Ionic, TypeScript, JavaScript, HTML, CSS
- ◆ **Databases:** SQL Server, PostgreSQL, MongoDB, MySQL, T-SQL, Stored Procedures
- ◆ **Cloud:** AWS, Azure, GCP, Terraform
- ◆ **Operating Systems:** Linux, Windows

Professional Experience

E4GS Interactive LLC / Claro Puerto Rico | Miami, FL & San Juan, PR (Remote)

Senior Developer | Aug 2014 – Oct 2025

tienda.claropr.com, claropr.com/personas, miclaro.claropr.com, empresas.claropr.com

- ◆ Designed and delivered Claro's E-commerce platform from scratch, a high-traffic system currently handling large daily transaction volume and serving hundreds of thousands of users.
- ◆ Led hands-on development across more than 14 digital solutions, establishing best practices that significantly reduced deployment times and improved system stability.
- ◆ Developed web, mobile, and tablet applications for in-store sales teams, increasing operational efficiency by over 15% and reducing errors in order processing.
- ◆ Designed and built the core Administrative & Customer Service system for Claro call centers, creating a unified platform for billing operations and line management.

Technologies: C#, ASP.NET, Angular, Ionic, React, React Native, Spring Boot, Java, TypeScript, SQL Server, AWS, Azure, GCP.

Advance Laboratorios | Caracas, Venezuela

Senior Developer | Jul 2012 – Jul 2014

somosadvance.com

- ◆ Designed a custom CRM from scratch, automating key sales processes including client management, quoting, and inventory control.
- ◆ Developed and deployed a sales performance evaluation system that improved decision-making and boosted team efficiency.
- ◆ Modernized the E-commerce platform, optimizing the sales funnel and integrating promotional tools, contributing to measurable revenue growth.
- ◆ Improved cross-team collaboration by centralizing data in the new CRM, reducing internal response times by **35%**.

Technologies: Java, SQL Server, JavaScript.

Servicios Netosfera | Caracas, Venezuela

Senior Developer | Jun 2011 – Jun 2012

- ◆ Developed full-stack web applications and integrated business solutions using Java, C#, JavaScript, SQL Server, MySQL, and PostgreSQL.
